## Summary

I have 10-year experience in working in industry and 4.5 years doing research in academia. I have background in Computer Science, and I am good at Mathematics and at Programming.

## Education

Ph.D. in Computer Science, NTNU, Norway (ongoing defense)	Mar 2017 - 2020
M.Sc. in Computer Science, Hunan University, China	Sep 2014 - Nov 2016
B.S. in Computer Science, Hanoi University of Technology, Vietnam	Sep 1999 - Jun 2004

## Work Experience

2017 – Present      Research Fellow, Department of Computer Science, NTNU, Norway

– I am a member of Data and Artificial Intelligence group, and working in the MUSED (MULTi-Source Event Detection) project at NTNU. The project handles big data streams in a wide-range of applications, e.g. classification, change detection, fraud detection, network attack, and genetics applications. I developed novel techniques and efficient algorithms for detecting events in various type of data. The short outcome of my work is summarized as follows:

Project 1. Optimize the memory usage, and propose a novel structure to avoid costly joins in mining high profit product groups. The method is *6 times lesser memory consumption*, and *10 times faster* than the state-of-the-art methods.

Project 2. Analyze the user activity behavior in social networks. I propose an evolving model to quickly adapt with the changes in user behaviors, which is more accurate in classification. The proposed method is 3.99% more accurate in classification task, and the error rate is **12 times better** than the existing methods (ACM CIKM 2019, Rank A).

Project 3. Develop theoretical proofs for multiple dense subtensor detection with guarantee on the density. Propose a new technique to detect *multiple dense subtensors* with a higher lower bound density guarantee. The method is *two million times more accurate* on density and *6.9 times faster* (IEEE ICDE 2020, Rank A\*).

- Programming Languages: Java, C++, MatLab, Python.

2014 – 2016 CSC Master in Computer Science, Hunan University, China

– Score 91.94/100, excellent. Taken courses are Algorithm Analysis and Design, Discrete Mathematics, Intelligent Optimization Algorithm, Advanced Artificial Intelligence, Program Language, Advanced Computer Organization, Advanced Data structure and Algorithm.

- Proposed a method for quickly raising the lower bound value to prune the search space in mining top-k high utility itemsets. Our method outperforms the state-of-the-art methods (*Knowledge-Based System*).

## Industry Working Experience

**2013 – 2014**

**Senior Software Engineer, MB Bank, Vietnam**

- Develop enterprise applications (HR) and business processing management (BPM) (appraisal process, loan process) using software-AG product, service monitoring tool. Advising and fixing some vulnerabilities and flaws of applications and systems.
- Platform & Techniques: Web-Based Application & Services. Software-AG, SQL-Server, PHP, C#, .NET Framework.

**2011 – 2013**

**Solution Architect, Team Leader, VTCMobile, Vietnam**

- Build Back-End framework and services for applications and games on mobile platform. Analyze and design databases and develop backends, restful services, C#, SQL-Server, NoSQL-MongoDB, OAuth.

**2006 – 2011**

**Researcher, CDIT, Vietnam**

- Designed solutions and developed applications for Vietnam Post, used in all post offices: Telecommunications service management, money transfer service management, parcel and package management, auto-update application.

- Platform & Techniques: Window & Web Based Applications. VB.Net, C#, ASP.NET, SQL-Server, Oracle.

*At the same time, I held the position as outsource software engineer for Vingroup, Vietnam.*

- Built HR system, Booking online, Member Management System, Real Estate Management.
- Platform: Window & Web Based Applications, .NET Framework, C#, DevExpress, SQL-Server.

**2004 – 2006**

**Software Engineer, VCCorp, Vietnam**

- Build content management system for news and financial (stock) service system. Build indicator, candle, pattern recognition and rebuild system with new technology, C#, APS.NET, NoSQL-Redis.

## Honors and Awards

- |   |             |
|---|-------------|
| 1. <b>National award in Mathematics</b> for high school student                           | 1999        |
| 2. Full CSC Scholarship for Master degree   | 2014 – 2016 |
| 3. <b>Selected for Best Papers</b> of the Industrial Conference on Data Mining Conference | 2016        |
| 4. PhD Fellowship   | 2017–2021   |
| 5. SIGIR Student Travel Grant   | 2019        |

## Research Interest

Data Mining, Algorithm Analysis, Optimization, Tensor and Graph.

Machine Learning and Artificial Intelligence.

## Selected Publications

Current h-index 8, 196 citations. For more details, please see my Google Scholar: <https://scholar.google.com/>
